Experience

Senior UX Designer

Globallogic | Mar 2021 - Present

- Successfully launched and scaled 10 products across diverse SaaS, B2B, and B2C markets. Leveraged agile methodologies and data-driven insights to enhance user experience. Incorporate AI driven features in multiple tool and achieve an average of **90% positive feedback** from users, showcasing adaptability in delivering impactful solutions across varied technological and business domains.
- As individual contributor, I manage the entire interaction design process, from understanding product requirements from PM to collaborating with developers to provide best experiences to users. This ensures translation of User interface requirements, leading to a user experience with a remarkable **positive feedback**.
- Collaborate with **5 PMs** to understand project requirements and embrace **user research methodologies** like contextual inquiry, diary research etc. to introduce innovative approaches that also helps me to improve product **usability by 56%**.

Senior Product Designer

Ofbusiness | Jul 2019 - Feb 2021

- I was responsible for **B2B, SAAS and B2C product** design from scratch to coordinate with Eng to develop pixel perfect tools.
- I conducted user research and took the help of Google Analytics followed by rapid ideation techniques like sketching and white boarding to generate a wealth of design solutions. Its helps product to gain **48% more users** compare to previous FY.

Product Designer

clik.ai | Jan 2019 - Jul 2019

Collaborated with Senior UX designer to understand product needs and pain points to create UI components, consistent icons and illustration patterns to optimized the design workflow, also ensured consistency and brand coherence across projects.

Visual Designer

iimjobs.com | Sep 2016 - Dec 2018

Responsible for end-to-end all visual design processes from Illustrate ideas using storyboards to UI components and widgets. Also involved with marketing team to create banner posters and magazine designs
